I'm diving into Go, wide awake through the night,

Chasing bugs, fixing loops, getting logic just right.

Packages, pointers yeah, I'll conquer the rest,

But somehow your smile runs the code in my chest.

My functions may fail, my brain may freeze,

Yet thoughts of you compile with effortless ease.

So while I'm learning Go's mysterious art,

You're the subtle import that rewrites my heart.

MWUAHH!!!
